1. Introduction

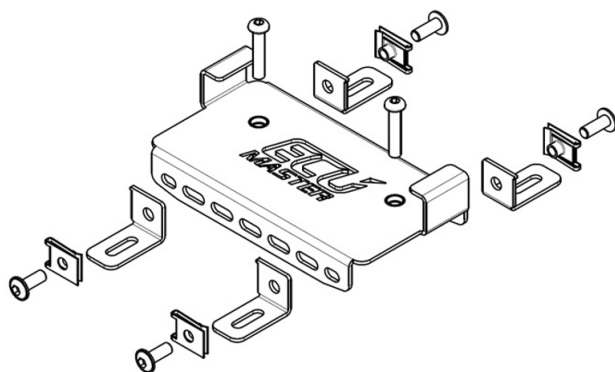

This document describes the installation of the dedicated mounting bracket kit for the GDI Driver. The mounting bracket allows secure installation of the GDI Driver while providing flexible positioning options and improved heat dissipation.

Features

- Designed specifically for the GDI Driver.
- Allows flexible mounting position adjustment.
- Provides stable device installation.
- Supports different mounting orientations.
- Flat mounting surface improves heat dissipation from the device.
- Adjustable mounting feet allow installation on flat and curved surfaces.

2. Specifications

Specifications	
Compatibility	GDI Driver
Material	Aluminium
Color	Black
Weight	110 g (bracket only) 158 g with feet and mounting plates, without screws
Dimensions	84 x 159 x 44 mm (bracket only) height 49 mm with feet

3. Package Contents

Item	Description	Qty
1	GDI Driver mounting bracket	1
2	Mounting feet	4
3	Threaded mounting plates	4
4	M6x30 screws	2
5	M6x16 screws	4

4. Installation

Step 1

Select the device mounting location in the vehicle.

Consider the following:

- Device orientation.
- Free air circulation around the device.
- Protection from excessive heat and water.
- Easy access to device connectors.
- Access to the wiring and sufficient space for the wiring connections.

Follow the device installation guidelines provided in the **Installation** section of the GDI Driver User Manual available on the Ecumaster website <https://www.ecumaster.com/files/devices/GDIDriver/GDIDriverManual.pdf>.

Step 2

Adjust the mounting bracket and mounting feet according to the selected installation location.

- The slotted holes in the side bends of the bracket allow flexible positioning of the mounting feet.
- The aluminium mounting feet have an extended section for mounting to the vehicle body. This section can be bent to match the shape of a curved mounting surface.
- Long mounting slots in the feet allow easier alignment with vehicle mounting holes.
- The threaded mounting plates can be installed on the mounting feet in either direction. This allows the mounting feet to be attached to the bracket in different configurations.

**Note:**

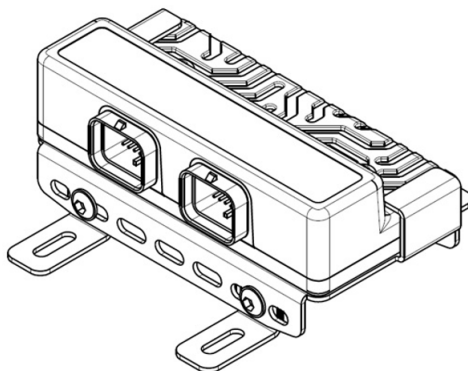

- The bracket must use at least three mounting points. Four mounting points are recommended.
- The bracket must be securely attached to the vehicle body.

Step 3

Install the GDI Driver on the mounting bracket.

**Note:**

The flat mounting surface of the bracket improves heat dissipation from the device.
